

Shreenath Chakinala

chakinalasreenath@gmail.com

945-272-6273

PROFESSIONAL SUMMARY:

- Over 9 years of experience as a Front-End Web Developer, specializing in app creation, troubleshooting, and testing.
- Proficient in using the Redux library to manage side-effects, asynchronous calls using ES6 generator functions, and optimize browser caching.
- Skilled in HTML5, CSS3, JavaScript, React (JS/Native), Node.js and Bootstrap.
- Develops interactive web pages using React concepts, JSX, and One-way data flow to create engaging UI experiences.
- Proficient in DOM manipulation and implementing RESTful APIs for effective data exchange.
- Expert in JavaScript Object Oriented Programming (OOP) and ES6 features like promises, classes, async/await, de-structuring assignment, modules, and extended parameter handling.
- Skilled in building modern web applications using React (JS/Native) and complementary libraries.
- Designs and develops web and enterprise applications with technologies like Web Services, JavaScript, and HTML.
- Creates page layouts using CSS3 and style sheet management frameworks such as SASS, LESS, Tailwind, Bootstrap, and Styled Components.
- Proficient with responsive design using Bootstrap grid system, Flex Box, and Grid.
- Familiar with system configuration tools like Webpack, Rollup, and Parcel.
- Experienced in building MERN and MEAN stack applications using NodeJS, Express JS, and MariaDB.
- Addresses cross-browser compatibility issues and proficient in debugging across Chrome, Firefox, Safari, and Edge.
- Engages in SDLC phases including Agile and Waterfall workflows.
- Proficient with IDE tools like Notepad++, JetBrains IDE, Eclipse, Sublime Text Editor, and VS Code.
- Skilled in Version Control tools: Git, GitLab, and Bitbucket for streamlined source code management.
- Effective communicator, adept at conveying technical and non-technical concepts, with strong troubleshooting skills for independent and collaborative tasks.

TECHNICAL SKILL:

Technologies	JavaScript, Typescript, HTML5, CSS3, Bootstrap, Responsive Web Design, Ruby, AJAX, JSON, DOM, XML, Web API.
Libraries	React (JS/Native), Styled Components, Redux (Thunk/Saga), Jest, Cypress, Sinatra, Bootstrap 5, Node.js, Express.js, and Tailwind.
Web Services	SOAP, REST.
IDE's	Visual Studio (VS Code), Eclipse, Sublime Text Editor, Web Storm.
Version Controls	Git, GitLab and Bitbucket.
Database Tools	Sequel Pro, Dbeaver and PhpMyAdmin.
Browsers	Chrome, Edge, Firefox, and Safari.
Operating Systems	Mac OS, Ubuntu, Windows, and Debian.

PROFESSIONAL EXPERIENCE:

Walmart

December 2024 – Present

Front End/React/W

Team: Checkout, Marketplace

Responsibilities:

- Develop reusable components and front-end libraries following Walmart's coding standards and best practices.
- Optimize components for maximum performance across a vast array of web-capable devices and browsers.
- Design and develop GraphQL queries and mutations to interact with backend services.
- Ensure efficient data fetching and state management within the application, leveraging GraphQL for optimal performance and data handling.
- Write and maintain unit and integration tests using Jest to ensure the reliability and quality of the application's codebase.
- Work closely with UX/UI designers to translate design mockups into functional and interactive interfaces.
- Participate in code reviews, provide constructive feedback, and ensure code quality and consistency across the team.
- Create and maintain comprehensive documentation for the application, including architectural decisions, code conventions, and API integrations.
- Understand and implement features that cater specifically to Walmart's business requirements and standards.
- Migration's and maintaining the mono-repo code base with standards instructed by the platform team.
- Bug fixing and restructuring the existing react based components for better performance and scalability.

Skills: HTML5, CSS3, JavaScript, ReactJS, ES6, GraphQL, Jest, TestCafe.

Optum(United Health Group)

June 2023 – December 2024

Front End / Sr. Software Engineer

Team: PAE.Sprinters

Responsibilities:

- Developed reusable UI components and front-end libraries adhering to Optum's coding standards and design principles, ensuring modularity and scalability for large-scale healthcare applications.
- Optimized front-end components for maximum performance across a wide range of healthcare-focused web-capable devices and browsers, enhancing user experience for patients and providers.
- Managed state and data fetching effectively within React and Angular applications, leveraging GraphQL and other APIs to support high-performance data-driven healthcare platforms.
- Wrote and maintained robust unit and integration tests using Jest and TestCafe to validate application functionality, ensure data accuracy, and maintain code quality.
- Collaborated closely with UX/UI designers to translate complex healthcare process flows and design mockups into intuitive, responsive, and interactive front-end interfaces.
- Participated in code reviews to ensure adherence to Optum's quality standards, improve code consistency, and mentor junior developers on best practices in React/Angular development.
- Created and maintained detailed documentation for front-end architecture, including API integrations, code conventions, and design decisions tailored to Optum's healthcare solutions.

- Migrated and maintained monorepo codebases in compliance with platform team standards, facilitating seamless integration and collaboration across multiple development teams.
- Identified and resolved bugs, restructured legacy React and Angular components for improved performance and scalability, and ensured compliance with healthcare regulations like HIPAA.

Skills: HTML5, CSS3, JavaScript, ReactJS, Angular, ES6, TypeScript.

Copart

March 2017 – May 2023

Front End/React/Sr. Software Engineer

Team: Yards

Projects:

Lot Maintenance (July/2021 – May/2023)

- Built on React (JS/Native) and Fabric UI using the global @copart components.
- socket-based locking mechanism for restriction of multiple user interactions on the same assignments.
- detailed representation of assignment and stage information view.
- document management and image gallery implantation.
- actions based on user eligibility. (security level implementation)

Notes (Sep/2020 – June/2021)

- Ruby Project was built on the Sinatra framework using DB2 as a database.
- Services provide the ability to add and retrieve different types of notes.
- notes may represent different types of activities and log registry to record the history for assignments.
- JWT auth token-based authentication implementation.
- validation for assignment, member and seller based on note types.

FSM (Facility Setup and Maintenance) (July/2018 – Aug/2020)

- Built on React and fabric UI CSS framework.
- Maintaining the appointments for vehicle pickup for loader.
- Scheduling the new unscheduled appointments (for front desk users).
- Facility based working and holiday management.
- Calendar for showing up the entire booking details in current day/week/month.
- Capacity management based on the individual time slots and working days.
- Default capacity template for facility to maintain future appointments.

Dispatch (March/2017 – June/2018)

- Built on React (JS/Native) and material UI components.
- Integrated google maps to represent the real-time location of Lots.
- creating route (path) for a driver to pick multiple assignment based on trip.
- GUI representation for facilities and zone-based charges calculation for trip.
- creating a trip for the dispatcher post the CFR process.
- trip confirmation process capturing the assignment details.

Responsibilities:

- Proficiently manage SDLC phases, including Requirement Analysis and Implementation, with accurate project timeline predictions.
- Craft efficient User Interaction screens using HTML5, CSS3, JavaScript, React, FluentUI/MaterialUI, Redux (Thunk/Saga), AJAX, and JSON.
- Develop, test, and refine web apps with Cypress/Jest, ensuring optimal performance.
- Manage version control and codebase repositories through Git/GitLab/Bitbucket.
- Efficiently track and document bugs using JIRA, maintaining comprehensive issue history.
- Actively contribute in Agile Scrum meetings, offering insights for iterative progress and issue resolution.
- Ensure accessible, compliant web pages via HTML5, CSS3, JavaScript, and React (JS/Native) components.

- Provide robust support for Ruby (Sinatra) based API development, enhancing app functionality.
- Design visually appealing styles and layouts with SASS, utilizing dynamic features.
- Implement responsive designs using CSS3 Media Queries, ensuring cross-device compatibility.
- Seamlessly facilitate service and UI wiring, optimizing app performance.
- Collaborate across teams to integrate cross-platform syncing features, enriching functionality.
- Strategically manage daily releases through CICD pipelines using Jenkins and Spinnaker.
- Develop React (JS/Native) components, Forms, Events, Router, and Flux for dynamic UI interactions.
- Skillfully implement JavaScript and jQuery libraries for precise form validation and enhanced interactivity.
- Master retrieving JSON data from Web APIs, skillfully parsing and visualizing using components.
- Develop reusable React components, manage states using Redux for optimized functionality.
- Design projects from scratch using modern ECMA Script (ES6), tools like Babel, TypeScript, and Webpack/Rollup.
- Enhance user experience by efficiently addressing bugs and improving UI quality.
- Collaborate with architects and back-end developers, introducing innovative features.
- Uphold UI guidelines and standards in website development, ensuring consistent presentation.

Skills: HTML5, CSS3, JavaScript, React (JS/Native), Ramda, Cypress, Styled Components, MaterialUI, FluentUI, Ruby, Sinatra, Node.js, Bootstrap, jQuery AJAX, Web API, and JSON, JIRA, ES5, ES6, Typescript.

Study Field Technology Pvt Ltd

April 2015 – Feb 2017

Front End /AngularJS/Software Engineer

Responsibilities:

- Created intuitive and interactive screens using Bootstrap and Angular, maintaining consistent style guides, themes, templates, and interface design.
- Transformed applications into Single Page Applications with Angular-Routing, enhancing user experience.
- Facilitated seamless server communication through jQuery and Ajax, enabling dynamic information retrieval on web pages.
- Ensured adherence to user interface standards throughout website development and maintenance, guaranteeing a unified user experience.
- Developed robust client-side validation code using JavaScript and jQuery, promoting data integrity and user-friendliness.
- Executed cross-browser compatible and standards-compliant CSS-based page layouts, ensuring visual coherence.
- Utilized various JavaScript and jQuery libraries, combined with AJAX, to establish form validation and engaging interactive elements.
- Efficiently fetched JSON data from Web APIs, skillfully parsing and visually representing using diverse data visualization components.
- Collaborated closely with UI/UX designers to translate concepts into vibrant web-based internal system interfaces and prototypes.
- Managed version control adeptly via Git and GitHub repositories, ensuring organized and seamless code management.
- Addressed cross-browser compatibility intricacies, meticulously debugging and enhancing functionality across different browsers.
- Translated wireframes into comprehensive templates, encompassing brand identity, menus, forms, buttons, icons, images, and application widgets with harmonious color schemes.
- Collaborated effectively with architects and back-end developers to gather requirements and introduce innovative features, enhancing application functionality.

- Utilized JIRA as a robust bug tracking system, ensuring effective issue management and resolution.
- Actively participated in Agile Scrum meetings, offering valuable insights to improve progress and issue resolution during iterative cycles.
- Developed Angular components from the ground up and tailored them from diverse libraries to align with application functionality needs.
- Executed user interfaces in line with the latest W3C standards, effectively rendering dynamic HTML templates using Angular JS.

Skills: JavaScript, HTML5, CSS3, Node.js, Angular.js, ES5, ES6, Bootstrap, Responsive Web Design, jQuery, XML, JSON, REST, Ajax, JSON, Git, GitHub, Agile, Windows.

Education:

- Degree of Master of Science in Information & Communication Technology from Veer Narmad South Gujarat University, Surat, Gujarat, India
- Degree of Bachelor of Computer Application from Veer Narmad South Gujarat University, Surat, Gujarat, India

Status: H1B
